Summary

Software Engineer with hands-on experience designing, developing, testing, deploying, and maintaining a **production SaaS platform** using **Java, Spring Boot, React, MySQL, Docker**, and **GitHub Actions CI/CD**. Strong foundation in **REST APIs, secure authentication, automated testing, cloud deployment**, and full-stack software engineering.

Technical Skills

Languages: Java, JavaScript, SQL, Python, C++, HTML, CSS

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT Authentication, Maven, Node.js, Express

Frontend: React, Vite, React Router, Tailwind CSS

Cloud & DevOps: Docker, GitHub Actions, CI/CD Pipelines, Vercel, Render, Railway

Testing: JUnit 5, Mockito, MockMvc, Vitest, React Testing Library

Databases: MySQL, Relational Database Design

Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code, Linux, Makefiles

AI & Integrations: OpenAI API, Gmail SMTP, Guardian Open Platform API, Prompt Engineering

Education

University of West Florida | B.S. Computer Science | Dec. 2025 | President's Honor Roll (3.9 GPA)

Projects

CogniHaven - Production AI-Powered Cognitive Wellness SaaS Platform | [Github](#) | Live Demo: [CogniHaven.net](#)

- Architected, deployed, and continue to maintain a production AI-powered SaaS platform spanning 15+ integrated product modules by engineering a full-stack application architecture with Java, Spring Boot, React, MySQL, Docker, and cloud infrastructure across Render, Railway, and Vercel.
- Engineered a production AI platform by integrating OpenAI API workflows with Spring Security, JWT Authentication, protected REST APIs, contextual AI services, analytics, and background scheduling across 15+ integrated product modules.
- Established an automated testing and CI/CD pipeline by developing and maintaining 30 automated frontend and backend tests using JUnit 5, Mockito, MockMvc, Vitest, and React Testing Library, integrated with GitHub Actions to validate production builds before deployment.

Munchify – Full Stack Recipe Sharing Platform | [Github](#)

- Designed a relational database architecture and REST API layer using Node.js, Express, and MySQL to support secure CRUD operations, normalized data relationships, and scalable backend services.
- Implemented JWT Authentication, bcrypt password encryption, and modular backend architecture to secure user accounts, protect API endpoints, and improve maintainability through separation of routing, middleware, and database access.

Stock & Housing Price Predictor | [Github](#)

- Engineered a data processing pipeline by integrating financial APIs and CSV datasets using libcurl, implementing linear regression models to generate stock and housing price predictions.
- Developed structured parsing and data validation workflows to eliminate malformed records and improve the reliability of numerical computations and predictive analysis.

Weather Subscription Application | [Github](#)

- Engineered a multithreaded client-server application supporting concurrent users by implementing TCP socket programming, mutex synchronization, and stateful communication in Linux.
- Developed secure authentication, session management, and real-time subscription services by coordinating client-server communication, managing socket connections, and debugging concurrent network operations.

Work Experience

Walmart — ATC (Air Traffic Control / Team Lead Role)

May 2020 Present

- Served as acting team lead during management absences, coordinating daily operations and training associates in a high-volume retail environment.
- Balanced full time employment while earning a B.S and independently developing a production SaaS platform.

DoorDash Delivery Driver

June 2023 Present

- Maintained high customer satisfaction while balancing full-time employment and academic commitments.

Leadership, Volunteer & Community Involvement

Football Team Captain • Track Team Captain • Class Representative • Boy Scouts • Football Camp Mentor • Peer Helper • Operation Santa Claus • Backpack Buddies • Animal Shelter Volunteer • AHSA Sportsmanship Award
